Trade Up Program - Migrate an Eligible IGEL OS license (with or without MMCP) to an IGEL OS11 license (incl. MMCP) with the purchase of 4 years maintenance. Proof of Purchase: View of UMS, Copy of order / Delivery note

Specifikation

Trade Up Program Makes IGEL OS 11 Easy to Adopt IGEL appreciates that customers running older versions of our operating systems may be looking for increased support for newer cloud-delivered desktops and newer endpoint technology integrations. IGEL OS 11 provides a secure workspace environment allowing access to Teradici Cloud Access Software (as an option), Office 365, Teams, Citrix, VMware, Amazon WorkSpaces and Microsoft WVD. To help those existing customers deliver newer platforms, support enhanced graphics and custom partitions, IGEL is offering IGEL OS 11 licenses as part of a trade up program to all customers, regardless of IGEL OS version, who sign up for three or more years of active maintenance. Moving to IGEL OS 11 ensures that customers can deploy the latest version of IGEL solutions and can benefit from over 80+ integrated technologies. Customers without active maintenance can buy into four years maintenance and incur NO additional license costs. This is available to customers with IGEL hardware and software, including those on older versions of thin and zero clients. Specifically, the trade up program is available to customers who have: • LX4 • LX5 • OS 10 • Windows embedded • IGEL Zero clients (IZ range)
