Propalms TSE 500-999 anv inkl. 2 år maintenance (pris/anv och år)

Specifikation

Windows 2008 Support: * TSE 6.0 fully supports Windows Server 2008 * Extended support for all New Terminal Services Enhancements Backwards Compatibility: * TSE 6.0 can manage Windows Server 2000, 2003 and 2008 * Run 'mixed' TSE teams and ease transition over to Windows 2008 while still using a common management interface across all servers TSE 'Intelligent' Connection Manager: * Many Windows 2008 Terminal Services features will require the latest Desktop OS for support. Therefore if a customer does not update all of their client devices they will not get the latest features from Windows 2008 TS * Propalms TSE 6.0 will allow users to take advantage of this functionality if the client is compatible, but more importantly will provide a mechanism where if the client is not of sufficient levels still offer them an alternative for the features they require NEW User Interface: * A new TSE Dashboard interface using advanced controls to show graphical displays of critical metrics within the Propalms Team * New easy navigation menus, search facility, hyperlink menus and tooltips simplify the administrative experience * Simple, Intuitive layout Printing: * HyperPrint – built-in PDF printing solution * Customizable printer naming scheme Download What's New Brochure - TSE 6.0 Propalms TSE 6.0, What's New - Click to Download Virtual Desktop Management: * Allows provisioning of 'Virtual Desktops' via Propalms TSE * Currently works with VMware Server * Perfect for customers looking for easy introduction to VDI * Ideal for 'Power User' requirements * Start 'VD' instance on least loaded Virtual Desktop Server * Assign users their own personal virtual desktop Virtual IP: * Many applications have a requirement for a unique IP address per user instance in order for them to work * In Terminal Services all users by default get assigned with the server's IP address to which they connect * Virtual IP allows the assignment of a unique IP address to each Propalms TSE session from a pool of addresses which solves this problem TSE Session Recorder: * Records Propalms TSE sessions for Compliance, Security and Support capabilities * TSE Sessions can easily be re-played from within the Propalms TSE Management Console Content Publishing and Redirection: * Publish individual files of all types directly to the LaunchPad * Redirect Media and HTTP requests to local devices rather than running on
